

## **R. Hi, Loser! or Hello, Champion!**

**Time Limit: 3 seconds**

### **Problem description**

One Piece to become a loser or a champion.

This is very simple problem, but it depends on your lucky or your smart to get the piece.

There are 6 test-cases, in which the input is always ZERO.

And there is only one test case the output message is “Hello, Champion!”, others are “Hi, Loser!”

The problem is that you have to guess where the piece of champion test case is located, and give all answers correct.

You can do your best to tried each position a time, but remember that with each failed trial, you will be punished by being added a 20 minutes penalty into your score. However, getting one AC is more worth than score.

### **Input:**

An integer value which is always 0

### **Output:**

There is only one case output message is “Hello, Champion!”, others are “Hi, Loser!”
